Introduction

Crime reporting in many regions is still dependent on manual, time-consuming, and paper-based processes. This often discourages citizens from reporting crimes promptly and makes case tracking inefficient. LawConnect provides a secure, web-based platform where citizens can report crimes, upload evidence, and track progress, while police officers and administrators can manage investigations efficiently.

Objective

- Provide an easy and secure way for citizens to report crimes online
 - Reduce paperwork and manual handling of crime reports
 - Improve transparency in crime investigation processes
 - Enable real-time tracking of complaints
 - Strengthen communication between citizens and law enforcement authorities
-

Problem Statement

Traditional crime reporting systems require physical visits to police stations, leading to delays, inconvenience, and lack of transparency. LawConnect solves these issues by providing a centralized, digital, and role-based platform for reporting and tracking crimes.

Proposed Solution

- Citizens submit detailed crime reports with evidence
 - Each report receives a unique case ID
 - Police officers update investigation status
 - Administrators manage users, assign cases, and monitor system activity
 - Ensures accountability, transparency, and secure data management
-

Target Audience

- General citizens
 - Police officers
 - Law enforcement administrators
 - Communities seeking safer digital reporting solutions
-

Scope

In Scope

- Online crime reporting
- Evidence upload (images/documents)
- Case status tracking
- Role-based dashboards (Citizen, Police, Admin)
- Admin analytics and reporting

Out of Scope

- Emergency response handling
 - Real-time police dispatch system
-

Features

Core Features

- User authentication and role management
- Crime report submission and management
- Evidence upload and secure storage
- Case tracking for citizens
- Police and admin dashboards

- Status updates and remarks

CRUD Operations

- Users
- Crime Reports
- Evidence Files
- Police Assignments
- Case Status Updates

API Endpoints

```
POST    /auth/register
POST    /auth/login
POST    /crime-report
GET     /crime-report/{id}
GET     /my-reports
PUT     /crime-report/{id}/status
POST    /assign-police
GET     /admin/analytics
```

Technology Stack

- **Backend:** Laravel (PHP)
- **Frontend:** Blade Template Engine, Bootstrap / Tailwind CSS
- **Database:** MySQL
- **Rendering Method:** Server-Side Rendering (SSR)

Project Milestones

Milestone 1: System Foundation

- Requirement analysis
- Database and ER diagram design
- Authentication and role management
- Basic UI layout

Milestone 2: Crime Reporting & Tracking

- Crime report module
- Evidence upload system
- Police dashboard
- Case tracking functionality

Milestone 3: Finalization & Deployment

- Admin panel and analytics
 - Security testing
 - Bug fixing
 - Final deployment and documentation
-

Expected Outcome

A secure, reliable, and transparent online crime reporting system that improves accessibility to law enforcement services and encourages citizens to report crimes confidently.

Setup Instructions

1. Clone the repository:

```
git clone https://github.com/yourusername/LawConnect.git
```

2. Install dependencies:

```
composer install  
npm install
```

3. Configure environment:

```
cp .env.example .env  
php artisan key:generate
```

4. Set up the database:

```
Create a MySQL database and update .env with DB credentials  
php artisan migrate --seed
```

5. Run the application:

```
php artisan serve  
npm run dev
```

6. Access the app:

Open `http://localhost:8000` in your browser

Conclusion

LawConnect modernizes crime reporting by reducing manual processes and improving transparency. It provides citizens, police officers, and administrators with a secure and efficient platform where **one click can make a difference.**
